VIVOTEK

VAST

Professional Video/
Central Management Software

H.265 Compression · Unlimited Number of Cameras Support ·
Video Wall · Windows Active Directory · Failover Redundancy

VIVOTEK's VAST is an intuitive professional video/central management software designed for managing all VIVOTEK IP surveillance products. It integrates next generation H.265 video codec and supports hundreds of cameras and stations in a hierarchical system structure for monitoring, recording, playback and event trigger management with effortless control. Furthermore, VAST offers the video wall solution, VAST Matrix, for hundreds of live view camera monitoring.

VAST expertly integrates with VIVOTEK's network cameras to provide the most expansive solutions and applications in video surveillance. Seamless recording with cameras for uninterrupted video recording, Panoramic PTZ for 360° seamless surveillance and VCA metadata Integration like Line Crossing Detection, Loitering Detection, Field Detection and People Counting Reports are among the highlights of this integration. At the system level, VAST supports failover redundancy to avoid single points of failure and ensures maximum system up time. It also supports setup of the VAST server on a virtual machine by using one powerful physical server running multiple VASTs on it. VAST performs remote management with the full range of the server & client structures and constitutes a robust system for various applications, such as Retail, Residential and Industrial.
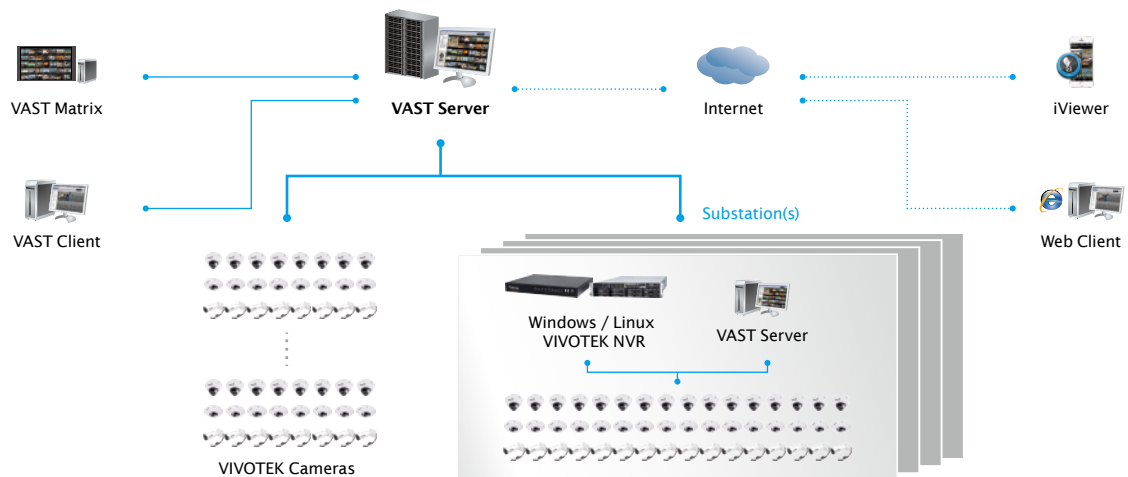

New Feature in Version 1.13

· Failover Redundancy
· Virtual Machine Supported
· RTSP Streaming Recording

· Joystick Enhancement
